

FLUSHING OIL

PSO Flushing Oil, carefully formulated with highly refined mineral base oil, is designed to flush the engine after the old oil has been removed from the system and before introducing fresh oil.

Benefits

- Excellent cleaning and flushing properties for engines and machine systems.
- Facilitates the removal of contaminants, providing protection for the fresh charge.

Application

- Ideal for flushing and cleaning the engine crankcase and other components before charging new oil to the sump.

Typical Characteristics*

PROPERTIES	METHODS	TYPICAL RESULTS
Kinematic Viscosity @ 100°C, cSt	ASTM D-445	4.1
Kinematic Viscosity @ 40°C, cSt	ASTM D-445	19.75
Viscosity Index	ASTM D-2270	95
Flash Point (COC), °C	ASTM D-92	180
Pour Point, °C	ASTM D-97	-6

*These typical characteristics mentioned are based on current mean values.

Based on available information, this product does not contain any component that may produce any significant hazard to health when used for the recommended application. Guidelines for health and safety are available in Material Safety Data Sheet of the product. Dispose of used oil, containers, cartons labels in an environment friendly manner. Do not discharge used oil into drain, soil or water. Advice on application not covered in this leaflet, may be obtained from lubricants.technical@psopk.com
